

PVC Flagging Tape

The bright PVC flagging tapes are highly visible for easy identification and with 12 colours to choose from, you can colour code to represent various categories or demarcate different areas. Our colourful flagging tape is ideal for flagging, sorting, field grading, harvesting and surveying work. Field surveyors can mark out boundaries for land exploration projects and forestry work, as well as to show where surveying will take place.

Labelling is stress-free, as there’s no smudging when writing on the matt finish PVC tape. It’s easy to tear and tie anywhere – to a stake, fence or plant – and is made to withstand harsh outdoor conditions.

Thickness: 70mic

Specifications:

Size - option 1	12mm x 50m
